Radiologic Technology Pinning Ceremony

Wednesday, May 15, 2013

6:00 P.M.

Student Center Building 4-200

1234 Columbus Avenue

Roxbury Crossing, Massachusetts

Health Sciences Division

The Radiologic Technology Program at Roxbury Community College provides students within the Greater Roxbury and Boston areas a quality degree program designed to prepare students for entry level Radiographer positions in a dynamic health care environment. Upon program completion, students will be eligible to apply for the national licensure exam for entry into practice and for further education for advanced certification or baccalaureate and graduate level education.

Recognizing that there are differences among learners, the program believes learning is best accomplished through adult education pedagogical practices, by building collaborative relationships, and with open communication among students, college faculty, clinical faculty, and agency staff. The program is committed to self-improvement via on-going assessment based on didactic and clinical course objectives, as well as evaluation by advisory board members, clinical affiliates, employers of our graduates, and the graduate themselves.

The program emphasizes a solid theoretical foundation focusing on current disciplinary knowledge, skills, and values as well as fostering the development of effective communication, decision-making, and professional skills. Roxbury Community College's Radiologic Technology Program prepares students for evidence-based practice in a rapidly changing, diverse health care environment supported by quality clinical facilities and instruction and a strong core curriculum in general education.
